

TECHNICAL FIELD BULLETIN

Date February 2005
Subject New AuditLok XLV and Edge Software Versions
Issue By NKL Cash Handling - a member of FKI Security Group
Issue To Sales and Service Personnel; Autobank and Edge Customers
Document 50201

OVERVIEW

Various minor updates have been made to improve and expand the AuditLok XLV software for NKL Autobank safes (and some Intellisafe models). In conjunction with the safe software, the PC software for remote safe data access (NKL Edge) is also revised.

PRODUCTS AND SERIAL NUMBERS AFFECTED

Edge 6.1 (new release) will connect with and provide complete access to all versions of AuditLok XLV software from Version 3.0 up to and including Version 3.39. The advanced Edge Plus features are not available when connecting to safes with AuditLok XLV versions below 3.0.

AuditLok XLV software version 3.39 is included on all safes (Autobank and Intellisafe) with AuditLok XLV electronics starting with S/N SP2005007204. AuditLok XLV Version 3.39 is not compatible with Edge version 6.0 or below (Edge 6.1 or higher is compatible).

ACTION REQUIRED

The Edge upgrade is only needed if you add new safes with AuditLok XLV 3.39 software. Current users of NKL Edge may upgrade to Edge 6.1 at no charge by contacting NKL Technical Service (1-800-452-4655). Upgrade instructions are provided with the software.

Current owners of AuditLok XLV safes do NOT need to upgrade their safe's software.

ADDITIONAL INFORMATION

If you have any questions or problems with the software contact NKL Technical Support at 1-800-452-4655. You can also check for more information about this update or any other product updates any time at www.fkitechinfo.com.
