

TECHNICAL FIELD BULLETIN

Date February 2009
Subject AuditLok XL Version 1.0.0
Document 90201-1069

OVERVIEW

This new XL software release includes numerous enhancements. These are the more significant changes:

- Supports English/Spanish/German.
- Added "24-Hour Lockout Schedule" feature. This feature allows the safe to be put in timelock for a full calendar day according to a user defined schedule. Up to eight dates may be set at any given time.
- Audit shows a star (*) next to the user number for keyed users. Audit shows user name.
- Daylight Savings is now universal. Specific dates for spring/fall are user defined.
- Added XL-iP remote software support. An override is required in order to turn on XL-iP support. Safe Serial Number (software parameter) is also required.
- Various new overrides implemented to support various new features.
- Various new audit entries have been added to support the new or updated features, particularly for remote communication via XL-iP.
- Corrected an issue in previous versions where #8 (armored car) keys were incorrectly being auto-deleted.

PRODUCTS AND SERIAL NUMBERS AFFECTED

First S/N with new XL software: SP2009006038

ACTION REQUIRED

Existing units in the field should not be updated with a new software unless required for XL-iP support or if an armored car service is used and the auto-inactivate or auto-delete features are used.
