# REAL PROTECTION IS THE ONLY OPTION.

You know you need affordable vital records protection. What you may not know is that real protection involves so much more than just being fireproof.

It means protection from the water that puts out the fire. Protection from the impact of falling debris and collapsing floors. Protection from the more intense heat of an explosion. And protection from unauthorized entry.

With FireKing® files, you don't have to sacrifice these essential features for the sake of affordability. In fact, only FireKing files ship complete with every feature you need to protect your vital records – standard, at no additional cost.

So make sure you know what you're getting (or not getting) from a file. Know that when it comes to your vital records, only FireKing believes that real protection isn't just an option. It's the only option.

The best records protection you can buy.
