

# IT'S MORE THAN A SAFE. IT'S A QUICK-CHANGE ARTIST.

The most advanced dispensing systems available, NKL® Autobank Dispensing Safes allow employees to make deposits and get change quickly and easily - while documenting every transaction. With built-in CPUs and control panels, these standalone or networkable units can also generate a wealth of sophisticated management reports and provide superior access control. You can even manage them remotely. With this many anti-theft and time-saving features, it's never been easier to keep cash so completely safe, yet so completely accessible.

The Smarter Way To Handle Cash

# NKL® Autobank Dispensing Safes

- D8C Controller unit contains a built-in CPU and control panel
- Generates a wealth of sophisticated management reports and provides superior access control that can be configured for multiple levels of authority
- Completely compatible with NKL's Autobank Validators and Intellisafes, so you can add to your system any time
- Once a D8C unit is installed, D8R Remote units can be added for remote operation
- Positive user ID – management controls who has access to the safe and when for up to 100 users
- 20,000-line audit trail
- 80-tube dispensary
- Print receipts and reports
- DualLanguage capabilities
- Time delays and time locks
- Manual drop drawer
- D8X Standalone unit features basic dispensing capabilities
- Built to same exacting standards as D8C model
- Medeco® key switches for normal and armored car door access
- Optional inner compartment with key lock
