

DISPENSES WITH TUBES. AND THE TIME IT TAKES TO FILL THEM.

TUBE OR TUBELESS, MAX VEND HANDLES MORE CASH, FASTER.

Process up to 600 rolls of coin at a time without tubes (or use tubes for cash). Use the on-board 1500-note validator for deposits and buying change. Dispense "make-ready" tills in a snap. With the new 4- or 6-bin NKL® Max Vend, you won't just welcome change. You'll embrace it.

IF TIME IS MONEY, YOU'RE ABOUT TO GET RICH.

Dispensing, validating, reporting, accounting, and bulletproof protection: Our new Max Vend is the all-in-one way to help high-volume retailers make the most of both time and money. By letting stores go "tubeless" — i.e., by not requiring tubes for rolled coin — it dramatically reduces loading time. Better yet, its AuditLok XLV electronics mean modular, network-style interface with POS systems, alarm systems, validators, and other NKL safes for total control. Whether you choose the 6-bin or 4-bin model, Max Vend ships with all the features, including our proprietary NKL Edge® software, the industry's most advanced remote-management and reporting tool. More capacity, more efficiency, less time, and fewer headaches.

MODEL NUMBER:

MV4100 — 4 Bins for a total capacity of 400 coin rolls
 MV6100 — 6 Bins for a total capacity of 600 coin rolls

DESCRIPTION:

High-Volume Coin Dispensing Safe

EXTERIOR DIMENSIONS:
