Front Hopper Depository FB2114

FB2114RE Shown

ABOUT THE FB SERIES

FB2114 Depository safes feature a front loading hopper for quick and easy deposit into a secure, fish-resistant compartment. Choose a key lock, a conventional dial combination lock, or a user-friendly battery powered digital combination lock.

MODEL FB2114RK

This model features a dual control safe deposit type key lock for quick and easy access. This economical version relies on physical authority (key) rather than intellectual authority (combination) for access.

MODEL FB2114RC

This model features a conventional UL Listed Group 2 dial combination lock. Dial combinations never require electrical power, yet allow for up to 1,000,000 possible combinations.

MODEL FB2114RE

This model features a digital combination lock. A digital combination provides better security because the combination must be entered every time the door is opened. Authorized personnel can use the digital combination to enter the safe in less than four seconds. The six-digit combination is also easy to change.

CHASSIS

Construction: Plate steel, B-Rate

Exterior Dimensions: 21"H x 14"W x 14"D
